My name is Gabriele Wodak. Born in Vienna, Austria as an animal - and especially dog lover I started to judge dogs before my 30th birthday and became a Rottweiler special judge over 30 years ago. Over all these years I have judged Rottweilers many times in all five continents as well as two all breed world dog shows and two IFR World Shows

The last show I have judged was the Austrian Bundessieger Show on October 1st 20223 in Tulln ,Austria (Pic 1)

I also used to show my Rottweilers from the kennels von der Teufelsbrücke and vom Vilstalerland. Have had Rottweilers for over 30 years.

For two periods I have been IFR president and was part of the Board of the Austrian Kennel Club (ÖKV), Austrian Working Dogs Association (ÖGV) and the Austrian Rottweiler Club over many years.

At the age of 50 I sold my company and devoted myself to safe animals.

I have a zoo with only rescued animals like horses, donkeys, camels, monkeys, farm animals and many more. I am passionate about animal rights and the fight against breed specific laws. Over the years I had the chance to be part of many newspaper interviews and TV Shows on this subject.

Besides Rottweilers and all other animals I love donkeys very much and have a good collection of them alive and in art.

Rottweiler

TRANSLATION: Mrs. Chris Seidler. **Revised by Peter Friedrich.**

ORIGIN: Germany.

DATE OF PUBLICATION OF THE ORIGINAL VALID

STANDARD: 15.06.2018.

UTILIZATION: Companion, service and working dog.

FCI-CLASSIFICATION:

Group 2 Pinscher and Schnauzer type, Molossian,
Swiss Mountain and Cattle Dogs.

Section 2.1 Molossian type, Mastiff type.

With working trial.

BRIEF HISTORICAL SUMMARY: The Rottweiler is considered to be one of the oldest dog breeds. Its origin goes back to Roman times. These dogs were kept as herder or driving dogs. They marched over the Alps with the Roman legions, protecting the humans and driving their cattle. In the region of Rottweil, these dogs met and mixed with the native dogs in a natural crossing. The main task of the Rottweiler now became the driving and guarding of the herds of cattle and the defence of their masters and their property. This breed acquired its name from the old free city of Rottweil and was known as the "Rottweil butcher's dog". The butchers bred this type of dog purely for performance and usefulness. In due course, a first rate watch and driving dog evolved which could also be used as a draught dog. When, at the beginning of the twentieth century, various breeds were needed for police service, the Rottweiler was amongst those tested. It soon became evident that the breed was highly suitable for the tasks set by police service and therefore they were officially recognized as police dogs in 1910.

Rottweiler breeders aim at a dog of abundant strength, black coated with clearly defined rich tan markings, whose powerful appearance does not lack nobility and which is exceptionally well suited to being a companion, service, **rescue** and working dog.

GENERAL APPEARANCE: The Rottweiler is a medium to large size, stalwart dog, neither heavy nor light and neither leggy nor weedy. His correctly proportioned, compact and powerful build leads to the conclusion of great strength, agility and endurance.

IMPORTANT PROPORTIONS: The length of the body, measured from the point of the sternum (breast-bone) to the ischiatic tuberosity, should not exceed the height at the withers by, at most, 15%.

BEHAVIOUR / TEMPERAMENT: The Rottweiler is good-natured, placid in basic disposition, very devoted, obedient, biddable and eager to work. His appearance is natural and rustic, his behaviour self-assured, steady and fearless. He reacts to his surroundings with great alertness **and at the same time even-tempered.**

HEAD

CRANIAL REGION:

Skull: Of medium length, **relatively** broad between the ears. Forehead line moderately arched as seen from the side. Occipital bone well developed without being conspicuous.

Stop: **Stop relatively strong. Frontal groove not too deep.**

FACIAL REGION:

Nose: Well developed, more broad than round with relatively large nostrils, always black.

Muzzle: The foreface should appear neither elongated nor shortened in relation to the cranial region.

The ratio between the length of the muzzle and the length of the skull is about 1 to 1,5. Straight nasal bridge, broad at base, moderately tapered.

Lips: Black, close fitting, corner of the mouth not visible, gum as dark as possible.

Jaws/Teeth: Upper and lower jaw strong and broad. Strong, complete dentition (42 teeth) with scissor bite, the upper incisors closely overlapping the lower incisors.

Cheeks: Zygomatic arches pronounced.

Eyes: Of medium size, almond-shaped, dark brown in colour.

Eyelids: Close fitting.

Ears: Medium-sized, pendant, triangular, wide apart, set on high. With the ears laid forward close to the head, the skull appears to be broadened.

NECK: Strong, of fair length, well muscled, slightly arched, clean, free from throatiness, without **excessive** dewlap.

BODY:

Back: Straight, strong, firm.

Loins: Short, strong and deep.

Croup: Broad, of medium length, slightly rounded. Neither flat nor falling away.

Chest: Roomy, broad and deep (approximately 50% of the shoulder height) with well developed forechest and well sprung ribs.

Belly: Flanks not tucked up.

TAIL: In natural condition, strong, level in extension of the upper line; **while paying attention, when excited or while moving it can be carried upward in a light curve;** at ease may be hanging. **While positioned along the leg, the tail reaches approximately to the hocks or is a bit longer.**

LIMBS

FOREQUARTERS: Seen from the front, the front legs are straight and not placed too closely to each other. The forearm, seen from the side, stands straight and vertical. The slope of the shoulder blade is about 45 degrees to the horizontal.

Shoulders: Well laid back.

Upper arm: Close fitting to the body.

Forearm: Strongly developed and muscular.

Pasterns: Slightly springy, strong, not steep.

Front feet: Round, tight and well arched; pads hard; nails short, black and strong.

HINDQUARTERS: Seen from behind, legs straight and not too close together. When standing free, obtuse angles are formed between the dog's upper thigh and the hip bone, the upper thigh and the lower thigh, and the lower thigh and metatarsal.

Upper thigh: Moderately long, broad and strongly muscled.

DQ – Disqualified by the Judge

Dog HAS checked in Dog HAS entered the ring

- If the DQ is for aggression or temperament, the critique ends at that point and dog leaves the ring.
- If the DQ is for reasons other than aggression or temperament (for example, missing tooth), at Judge's discretion the critique may continue as exhibition only for learning purposes of the exhibitor.
 - Critique IS completed at Judge's discretion *OR* to point of disqualification. Reason for disqualification is entered on the critique and the rating box is marked as DQ.

Pulled = Dog is not presented for Judging

Dog HAS checked in. Dog HAS NOT entered the ring *OR* Dog HAS entered the ring. Dog HAS NOT been presented to the Judge

- The owner may pull the dog at their discretion.

Dog HAS entered the ring Dog *MAY* or *MAY NOT* have been presented to the judge at the time of being excused

- This rating is also to be given if traces of operations or treatment can be observed which seems to indicate that the exhibitor wanted to deceive the judge. The same applies if the judge has ample reason to suspect operations that were intended to correct the original condition or feature (e.g.: eyelid, ear or tail)
 - Critique IS completed at Judge's discretion *OR* to point where dog is excused Critique ends with "Excused" and the reason and the rating box is marked as Excused.

AB = Absent

URKA Inc. "Health Certification" Program

URKA has developed a program to educate and encourage our members and supporters to strive to better the breed through health testing prior to breeding.

To achieve this, we have 4 levels of "URKA Health Tested Certification" awards available for individual dogs.

Members are encouraged to apply for an award certificate upon obtaining passing results.

URKA Health Tested Certification Awards are as follows:

	BRONZE	SILVER	GOLD	PLATINUM
HIPS	#####	#####	#####	#####
ELBOWS	#####	#####	#####	#####
JLPP	#####	#####	#####	#####
HEART		#####	#####	#####
EYES			#####	#####
SE/ZTP			#####	#####
ADDITIONAL				#####

It is strongly encouraged that all members receive a ZTP or Standard Evaluation on their dogs when breeding is considered.

www.unitedROTTklub.com

info@unitedROTTklub.com

The SE (Standard Evaluation) is not a breed test. URKA Inc. Encourages all breeders to place SE on their breeding stock as URKA Inc. believes breeders should know the measurements of dogs they are breeding as well as eye colour. The SE ensures the dog has a passing hip and elbow rating, JLPP tested and is free of disqualifying fault under FCI standard. Puppy buyers are encouraged to only purchase pups whose parents possess either a SE or a Ztp. The dog must have a passing hip and elbow rating, have been tested for JLPP and have permanent identification (tattoo or microchip). Once the conformation and soundness qualifications have been met, the dog's traffic sureness is tested. This test includes a gun sureness test and a test to ensure the dog is stable around the public. If a dog has a SE and loses a tooth, the dog may still be bred and may also attempt the Ztp.

The Ztp (Zuchtauglichkeitsprüfung) is designed to select those Rottweilers who are worthy of being bred. The dog's conformation must be judged of breeding quality and free of disqualifying faults. The dog must have a BH, passing hip and elbow rating, have been tested for JLPP and have permanent identification (tattoo or microchip). Once the conformation and soundness qualifications have been met, the dog's temperament is tested. This test includes a gun sureness test, a protection test, and a test to ensure the dog is stable around the public. The Rottweiler Klub of North America Inc. strongly believes that these tests are vital to maintaining the Rottweiler in type and temperament and should be the foundation of any breeding program.

The KORUNG – Gekört (title) is designed to select those Rottweilers who are the best dogs in order to improve the overall qualities of the Rottweiler. Males must be IGP 3 and females IGP 1, must have an AD and three show ratings under two different judges of SG or better. The protection routine shall be the FCI IGP 3 protection routine. The IGP rule book can be downloaded from the URKA Inc. website.

The LIFETIME KORUNG - Gekört bis Eza (title) may be attempted 24 months after a dog has earned the Gekört is the highest breed suitability title available and is the lifetime breed suitability test. A dog must have sired/whelped two litters where all offspring are free of disqualifying fault according to FCI standard.

*****Korung is the event and the titles earned are Gekört and Gekört bis Eza*****

Working Class - to compete in this class a dog must have earned an IGP title which is an internationally recognized temperament test for the working breeds. The dog must pass a tracking test, an obedience test and a protection test. The exercises in all three phases of the 4 tests are designed to demonstrate the dog's natural drive to work for a handler as well as the strength of character that it takes to have those drives molded into a disciplined behavior. It is the goal of the Rottweiler Klub of North America Inc. to promote the working Rottweiler through the IGP sport.
